

HELENA VALLICROSA POU

Academic formation

PhD Student. Universitat Autònoma de Barcelona/CREAF. (Now)

Master's degree in Terrestrial Ecology and Biodiversity Management.

Universitat Autònoma de Barcelona (2016-2017). Specialist in Terrestrial Ecology.

Degree in Ambiental Biology. Universitat autònoma de Barcelona (2012-2016)

Research topic

My main work is about searching relationships between biogeochemical cycles and elemental composition of plant-soil system with some of the main ecological and environmental traits (grow, diversity, climate, soil type, photosynthetic capacity, metabolic function...) at world scale
